ProCHO® 5 Protein Expression Media

Boost Cell Production with a Proven Platform

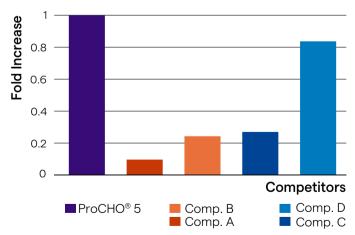

ProCHO® 5 is a first-generation Lonza CHO media, optimized for cell growth and protein production.

ProCHO® 5 is a non chemically defined, serum-free, non animal origin media for supporting high density CHO cells in suspension. For therapeutic bioprocessing applications, these formulations also facilitate both downstream purification and regulatory compliance.

ProCHO® 5 has been in the marketplace for many years and is used in association with several late-phase and commercial Biosimilar and Originator molecules, developed in a range of CHO cell lines.

ProCHO® IgG Protein Concentration

ProCHO® Protein Expression Media

BioWhittaker® ProCHO® Media:

- Maximal culture performance through balanced formulation
- Maintain high viability (>90%) at high cell densities
- Easily scalable to support high density, large-scale production volumes
- Produced in an ISO 13845 facility according to GMP for research and for further manufacturing applications
