

Airway Cell Culture Media Guide

With Final BulletKit® Concentrations

Tailored Primary Cell Media to Accelerate Your Airway Research

At Lonza, we offer a wide array of normal and diseased human airway cells including epithelial, smooth muscle, fibroblast, and endothelial cells isolated from various donors. Cells from donors diagnosed with conditions like asthma, COPD, cystic fibrosis, or idiopathic pulmonary fibrosis (IPF) are also available with detailed donor information available upon request.

Our primary cell media is specifically tailored for airway cells, ensuring consistent growth and differentiation. Our BulletKit® media contains essential growth factors and hormones, maintaining cell-specific characteristics. This media supports the establishment of complex co-culture models and advanced cell culture techniques. In addition, our air-liquid interface (B-ALI™) media facilitates physiologically relevant research on small airway epithelial cells that mimics the *in vivo* conditions found in the human airway.

Find the best specialty media for your application:

B-ALI™ Bronchial Air-Liquid Interface Medium BulletKit® (00193514)

- Promotes full differentiation of the airway epithelium

expressed by the formation of a polarized epithelium with good barrier function (transepithelial resistance), secretory phenotype (mucin secretion) and ciliogenesis, when used with our B-ALI™ guaranteed bronchial epithelial cells (CC-2540S).

BEGM® Bronchial Epithelial Cell Growth Medium BulletKit® (CC-3170)

- Specially designed to support the growth of human bronchial epithelial cells. BEGM® is serum-free and has been optimized to grow cells from normal and diseased tissues.

EGM® 2 Endothelial Cell Growth Medium-2 BulletKit® (CC-3162)

- EGM®-2 performs best with certain HUVECs, aortic and pulmonary artery endothelial cells. It contains both FBS and VEGF for rapid proliferation but does not contain BBE.

EGM® 2 MV Microvascular Endothelial Cell Growth Medium-2 BulletKit® (CC-3202)

- Optimized for human coronary and iliac artery cells and microvascular cells, including lung microvascular endothelial cells, EGM® 2 MV contains FBS and VEGF but no BBE.

FGM[®] 2 Fibroblast Growth Medium-2 BulletKit[®] (CC-3132)

- Developed to support the growth of most primary human fibroblasts including lung and dermal fibroblasts.

SAGM[™] Small Airway Epithelial Cell Growth Medium BulletKit[®] (CC-3118)

- SAGM[™] is serum-free and optimized for human small airway epithelial cells from normal and diseased tissue.

S-ALI[™] BulletKit[®] Small Airway Air-Liquid Interface BulletKit[®] (CC-4539)

- Similar to our B-ALI[™] BulletKit[®], S-ALI[™] promotes full

differentiation of the small airway epithelium expressed by the formation of a polarized epithelium with good barrier function, secretory phenotype and ciliogenesis. Best when used with our B-ALI[™] guaranteed small airway epithelial cells (CC-2547S).

SmGM[®] 2 Smooth Muscle Growth Medium-2 BulletKit[®] (CC-3182)

- Developed for the maintenance and expansion of human smooth muscle cells from various tissue origins including cardiac, airway, prostate and more.

Airway Cells

Catalog #	Description
CC-2547	Small airway epithelial cells
CC-2547S	Small airway epithelial cells guaranteed for B-ALI™ differentiation
CC-2540	Bronchial/Tracheal epithelial cells with retinoic acid
CC-2541	Bronchial/Tracheal epithelial cells without retinoic acid
CC-2540S	Bronchial/tracheal epithelial cells guaranteed for B-ALI™ differentiation
CC-2512	Lung fibroblasts
CC-2527	Lung microvascular endothelial cells
CC-2530	HPAEC Pulmonary artery endothelial cells
CC-2576	Bronchial smooth muscle cells
CC-2581	Pulmonary artery smooth muscle cells
194911	(Asthma) Bronchial epithelial cells
194911S	(Asthma) Bronchial epithelial cells guaranteed for B-ALI™ differentiation
194850	(Asthma) Bronchial smooth muscle cells
CC-2932	(Asthma) Small airway epithelial cells
195275	(COPD) Bronchial epithelial cells
195275S	(COPD) Bronchial epithelial cells guaranteed for B-ALI™ differentiation
195277	(COPD) Lung fibroblasts
CC-2934	(COPD) Small airway epithelial cells
196979	(Cystic Fibrosis) Bronchial/Tracheal epithelial cells
194843	(Cystic Fibrosis) Lung fibroblasts
CC-2933	(Cystic Fibrosis) Small airway epithelial Cells
CC-2923	(Diabetic Type 1) Pulmonary artery endothelial cells
CC-7231	(Idiopathic Lung Fibrosis) Lung fibroblasts
