Clonetics™ Prostate Smooth Muscle Cell Systems
PrSMC

Introduction
Clonetics™ Prostate Smooth Muscle Cell Systems contain Normal Human Prostate Smooth Muscle Cells (PrSMC) and optimized medium for their growth. Each System can generate PrSMC cultures for experimental applications in benign prostatic hyperplasia (BPH), prostatis and prostate cancer. Clonetics™ Prostate Smooth Muscle Cell Systems are convenient and easy to use, allowing the researcher to focus on results. Cryopreserved PrSMC are shipped in second or third passage. Proliferating PrSMC are shipped in third or fourth passage.

Clonetics™ Cells, Medium and Reagents are quality tested together and guaranteed to give optimum performance as a complete cell system.

Cell System Components
- One Prostate Smooth Muscle Cell Product (Cryopreserved or Proliferating)
- One Smooth Muscle Cell Medium BulletKit™ - 500 ml
  Clonetics™ SmGM™-2 BulletKit™ (CC-3182) contains one 500 ml bottle of Smooth Muscle Cell Basal Medium and the following growth supplements: hEGF, 0.5 ml; Insulin, 0.5 ml; hFGF-B, 1ml; FBS, 25 ml; GA-1000, 0.5 ml.
- One ReagentPack™ (CC-5034) Containing: Trypsin/EDTA 100 ml
  Trypsin Neutralizing Solution 100 ml
  HEPES Buffered Saline Solution 100 ml

Characterization of Cells
Routine characterization of PrSMC includes immunofluorescent staining. Cells stain positive for smooth muscle α-actin and negative for von Willebrand (Factor VIII) antigen.

Performance
Recommended seeding density for subculture 3,500 cells/cm²
Typical time from subculture to confluent monolayer 6 - 10 days
Additional population doublings guaranteed using Clonetics™ System 10

Quality Control
All cells are performance assayed and test negative for HIV-1, mycoplasma, Hepatitis-B, Hepatitis-C, bacteria, yeast and fungi. Cell viability, morphology and proliferative capacity are measured after recovery from cryopreservation. Clonetics™ Media are formulated for optimal growth of specific types of normal human cells. Certificates of Analysis (COA) for each cell strain are shipped with each order. COA's for all other products are available upon request.

Ordering Information
Cryopreserved Cells
CC-2587 PrSMC ≥500,000 cells

Proliferating Cells – Flasks and Multiwell Plates
CC-2587T25 T-25 Flask
CC-2587T75 T-75 Flask
CC-2587W96 96-well Plate
Other proliferating formats are available. Contact Scientific Support or refer to the Lonza website for details.

CC-3182 SmGM™-2 BulletKit™, SmBM™ plus SingleQuots™ of growth supplements 500 ml
CC-3181 SmBM™, Smooth Muscle Cell Basal Medium 500 ml
CC-4149 SmGM™-2 SingleQuots™
Formulates SmBM™ to SmGM™-2

CC-5034 ReagentPack™

- Trypsin/EDTA Solution 100 ml
- Trypsin Neutralizing Solution 100 ml
- HEPES Buffered Saline Solution 100 ml

When placing an order or for technical service, please refer to the product numbers and descriptions listed above. For a complete listing of all Clonetics™ Products, refer to the Lonza website or the current Lonza catalog. To obtain a catalog, additional information or technical service you may contact Lonza by web, e-mail, telephone, fax or mail.

Product Warranty

CULTURES HAVE A FINITE LIFESPAN IN VITRO. Lonza guarantees the performance of its cells only if Clonetics™ Media and Reagents are used exclusively, and the recommend protocols are followed. The performance of cells is not guaranteed if any modifications are made to the complete Cell System. Cryopreserved PrSMC are assured to be viable and functional when thawed and maintained properly.

THESE PRODUCTS ARE FOR RESEARCH USE ONLY. Not approved for human or veterinary use, for application to humans or animals, or for use in clinical or in vitro procedures.

WARNING: CLONETICS™ AND POIETICS™ PRODUCTS CONTAIN HUMAN SOURCE MATERIAL, TREAT AS POTENTIALLY INFECTIOUS. Each donor is tested and found non-reactive by an FDA approved method for the presence of HIV-1, Hepatitis B Virus and Hepatitis C Virus. Where donor testing is not possible, cell products are tested for the presence of viral nucleic acid from HIV, Hepatitis B Virus, and Hepatitis C Virus. Testing can not offer complete assurance that HIV-1, Hepatitis B Virus, and Hepatitis C Virus are absent. All human sourced products should be handled at the Biological Safety Level 2 to minimize exposure of potentially infectious products, as recommended in the CDC-NIH Manual, Biosafety in Microbiological and Biomedical Laboratories, 5th Edition. If you require further information, please contact your site Safety Officer or Scientific Support.
