

PowerCHO[®] 2 Protein Expression Media

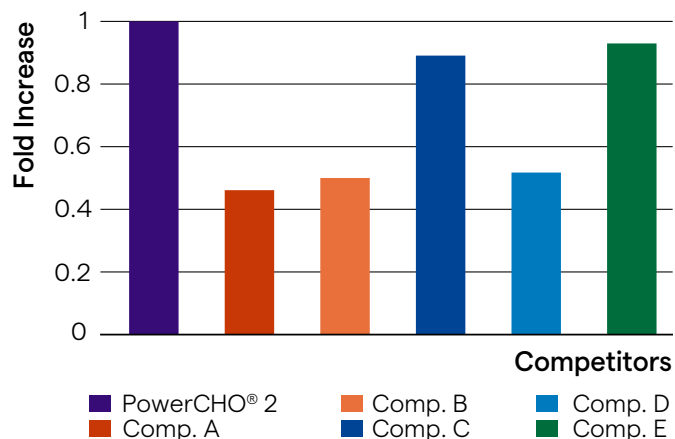

Boost Cell Production with a Proven Platform

PowerCHO[®] 2 is the second-generation of Lonza CHO media. It is a chemically defined, serum-free CHO medium, optimized for cell growth and protein production. Its non-animal origin formula is a proven media for supporting high density CHO cells in suspension.

For therapeutic bioprocessing applications, this protein-free formulation facilitates both downstream purification and regulatory compliance.

PowerCHO[®] 2 IgG Protein Concentration

BioWhittaker[®] PowerCHO[®] 2 Media:

- Maximal culture performance through balanced formulation
- Maintain high viability (>90%) at high cell densities
- Confidence in lot-to-lot performance with chemically-defined, serum-free media
- Easily scalable to support high-density, large-scale production volumes
- Produced in an ISO 13845 facility according to GMP for research and for further manufacturing applications

PowerCHO® 2 Media

Lonza has many years of experience in providing serum-free CHO media to research and industrial customers. Our PowerCHO® 2 Medium has been in the marketplace for over a decade and has established itself in association with several late-phase and commercial Biosimilar and Originator molecules, developed in a range of CHO cell lines.

The PowerCHO® 2 Medium delivers many benefits including consistent results, simplified downstream purification, and maximized yield.
